## Profile

Hi, I'm **Yuvraj Champaneri** — a Django Developer and Data Analyst skilled in **Python, Django, n8n automation, and Power BI**. After completing a 6-month internship at **Mighty Ventures Business Solutions LLP**, I joined the team as a **Junior Python Developer**, where I focus on building scalable applications, integrating automation workflows, and delivering data-driven insights. I was proudly recognized as **Employee of the Month** for my outstanding contributions and commitment to excellence.

## Experience

## Projects

---

### **n8n**

Automation & Chatbot Projects

Developed n8n workflows to automate routine tasks such as sending dynamic email notifications and integrating with my Django project. Built an AI-powered chatbot for real-time user support, enhancing engagement and streamlining business processes.

### **Young India Ahmedabad**

(Django)

Developed a dual admin panel with forgot password functionality and various software solutions for Young India Ahmedabad. Implemented Django-based full-stack functionalities, including authentication, user roles, and database management, ensuring smooth operations and automation.

### **Jewelry Shop Website**

(Django)

A platform with login/signup, user management, and CRUD operations for showcasing new collections.

### **Skill Nation Visualization Project**

(Power BI)

A standalone data visualization project created entirely using Power BI Desktop, showcasing interactive dashboards and insights.
