n8n, Python Web Scraping

Frontend
HTML, CSS, Bootstrap

Tools
Git, GitHub, Power BI

Database
PostgreSQL , SQLite

AI / GenAI
LangChain, RAG, OpenAI

Projects

Nirmal PMS – Product Management System
(Django)

- Developed a Django-based product management system for **job entry, cylinder entry, quotation, and proforma invoice management**.
- Implemented **CRUD operations, database relationships, and dynamic form functionality**.
- Streamlined daily business operations by reducing manual data management.

n8n
Automation & Chatbot Projects

- Built automation workflows for **lead generation, email marketing, and scheduled notifications**.
- Integrated **third-party APIs** to automate data collection and business workflows.
- Developed **AI-powered chatbot workflows** for customer support and HR use cases.

RAG-based AI Application
Python | LangChain | OpenAI | Qdrant
- Built a **Retrieval-Augmented Generation (RAG)** application for document-based question answering.
- Implemented **document processing, embeddings, vector storage, and similarity-based retrieval** using Qdrant.
- Integrated **OpenAI** with LangChain to generate responses using retrieved document context.

Young India Ahmedabad – Admin Management System
(Django)
- Developed a **Django-based admin management system** with authentication and user-role management.
- Implemented **forgot-password functionality** and database-driven administrative features.
- Built full-stack functionality to support day-to-day management operations.
